

FOOD & DRINK WALES NETWORK

World Class Skills for World Class Food and Drink in Wales

Along with food firms across the country, **Improve, the Skills Council for food manufacturing**, has welcomed the Welsh Government's Action Plan to help the Welsh Food Industry grow by 30 per cent to £7billion by 2020.

The move promises a step change in targeted assistance driven by industry needs - **but support is available right now to firms looking to increase productivity, growth and competitiveness through better workforce skills.**

Supported training through Improve differs from many current funded programmes which can sometimes be too general or may require staff to be away from the production area for extended periods. In contrast, **training sourced through Improve is not only industry-specific but built entirely around the individual needs of your company, your sector and your workforce.**

Training through Improve also makes life **easier and hassle-free**. We take care of all funding-related paperwork and ensure the training provider you work with is not only an industry specialist but quality accredited. Whatever the size of your business – Micro, SME or large company – you can benefit from financial support around **any of the funding-approved subject areas listed below.**
