

MICRO KILN

The Micro Kiln is a cost effective way of hot or cold smoking small batches of product. It is designed to smoke the product in the traditional manner. Product can either be hung in the kiln or placed on mesh trays.

Kiln Dimensions: 650mm Wide x 650mm Deep x 1500mm Tall.

Benefits include:

- Low capital investment
- Low energy costs
- Simple to install and operate
- Very low maintenance costs
- Small unit footprint
- Easy to clean
